Features

Multienterprise Information Network Tower, solution version 12.0.0

The following new or updated functionality will be included in this release.

View Sent Serialized Shipment Notices in the Web UI

Companies that own Multienterprise Information Network Tower and Serialized Operations Manager (SOM) can view Serialized Shipment Notices in the Web UI that they have sent via SOM, or asynchronously using Multienterprise Process Link. Serialized shipment notices allows customers to communicate with suppliers the comprehensive and detailed information about a shipment, including item-level serialization data. Owners can search for and view the details of transactions for serialized shipment notice messages that are sent to suppliers.

For companies whose Partners do not own Multienterprise Information Network Tower, Owners can add their Partner's users to their network and assign them the appropriate roles to enable them to search for, and view the sent serialized shipment notices in the Web UI using the Owner's instance of Multienterprise Information Network Tower.

The serialized shipment notices are available in the manufacturing orchestration.

Impact analysis

- Interface options:
    - Web UI
- Business segment impacts:
    - All business segments for both Owners and Partners.

View Received Serialized Shipment Notices in the Web UI

Companies that own Multienterprise Information Network Tower can view received Serialized Shipment Notices in the Web UI. Serialized shipment notices allows suppliers to communicate with customers to verify the authenticity, integrity, and completeness of the shipment upon receipt and supports seamless data integration. Owners can search for and view the details of serialized shipment notice messages that are received from suppliers.

For companies whose Partners do not own Multienterprise Information Network Tower, Owners can add their Partner's users to their network and assign them the appropriate roles to enable them to search for, and view the received serialized shipment notices in the Web UI using the Owner's instance of Multienterprise Information Network Tower.

The serialized shipment notices are available in the manufacturing orchestration.
