API features

The following new or updated API functionality is included in this release.

Create Compliance Exceptions

Users of Agile Process Teams can now use the [compliance exceptions API](#), to create and manage compliance exceptions to collaborate with relevant upstream or downstream partners, and resolve issues quickly. Compliance exceptions allow Owners or Partners to collaborate with their internal locations and external Partners to record and report a variety of deviations for products throughout the supply chain. Compliance Exceptions are created as a sub-type of the Work Item base object, ensuring efficient tracking and resolution.
