## API features

There is no new or updated API functionality included in this release.

# System features

The following new or updated system functionality is included in this release.

## Create Compliance Exceptions from Serialized Operations Manager

This feature includes updates to TraceLink's internal APIs which allows creating compliance exceptions directly from Serialized Operations Manager.

The impacts for this feature are the same as the [Create Compliance Exceptions from Serialized Operations Manager](#) feature in the Supply Chain Work Management, solution version 12.0 release.

## Usability Enhancements to Existing Processes

This feature includes updates to TraceLink's internal APIs which enhances usability for all processes by supporting the .json file type for attachments. This feature also enhances the document reviews process to view the user name in the Last Modified column on the Search screen.

The impacts for this feature are the same as the [Usability Enhancements to Existing Processes](#) feature in the Supply Chain Work Management, solution version 12.0 release.
