Features

Multienterprise Information Network Tower, solution version 10.0.0

The following new or updated functionality is included in this release.

Search for Price Sales Catalog and Remittance Advice B2B Messages in the Web UI

Companies that own Multienterprise Process Connect and their Partners can view and [search messages](#) for price sales catalog and remittance advice messages that are exchanged with Partners. Searching for and viewing [Price Sales Catalog](#) and [Remittance Advice Message Types](#) that are sent asynchronously via Multienterprise Process Connect enables users to monitor the status of their messages, confirm that they have been sent or delivered, and troubleshoot message issues by viewing any errors or downloading the message input, output, and canonical files. Additionally, Application Administrators can manually reprocess outbound messages from TraceLink that failed to deliver.

For more information about the new price sales catalog and remittance advice messages, see [Preview the API changes](#).

Impact analysis

- Interface options:
 - Web UI
- Business segment impacts:
 - All business segments for both Owners and Partners.

Usability Enhancements

This feature includes small fixes to optimize usability such as ensuring the **Receiver** field is populated correctly when viewing the details of a B2B message. This feature also includes other minor updates to improve the Multienterprise Information Network Tower solution's stability and its ability to communicate with other TraceLink apps and solutions.

Impact analysis

- Interface options:
 - Web UI
- Business segment impacts:
 - All business segments for both Owners and Partners.

Resolved issues

Multienterprise Information Network Tower, solution version 10.0.0

The following issues are resolved in this release.

ID	Interface	Issue Description
36946: Getting an Error When Searching with Value Containing Spaces on Sent PO, Received PO, Sent POAck and Received POAck Screen	Web UI	When searching B2B messages in the Web UI, no results are returned when the Keywords field contains any spaces. This issue has been resolved.
36945: Getting an Error When Searching with Value Containing Spaces	Web UI	The system considers the space-separated values as new search values that the reason open search is not able to find exact search results. This issue has been resolved.
36947: Search Query not Populating Keyvalue list and Status Filter Working on Keyvalue List Instead of Current Base State Value	Web UI	The Search screens is not populating the keyvalue list and status filter not working properly for the current base state value for the Sent PO, Received PO, Sent POAck and Received POAck transactions. This issue has been resolved.
