Serialized Product Intelligence

Select to choose your “multienterprise apps” (apps to which your partners can link) using the **network composer**.

Select to choose your partners’ “multienterprise apps” (apps to which you are linked) using the **network composer**.

Select an “enterprise app” (apps that only users at your company can see.) The network composer does not display.

Tabs

Work in multiple apps at once. Tabs are saved when you log out.

Network Composer

Pick the name of the network and a Partner (or all Partners) from the network composer. “Partner” was previously “Team.”
