Features

The following new or updated functionality is included in this release.

Enhancements to Support Large Quantities of Serial Numbers

The internal version of the Product Information Manager solution for TraceLink's Network Operations team is enhanced to process large quantities of serial numbers for recalls.

Impact analysis

- Interface options:
 - Web UI

- Business segment impacts:
 - All business segments for both Owners and Partners

Enhancement to Improve Processing Efficiency

The Product Information Manager, solution version 9.0 Web UI is enhanced to reprocess transactions more efficiently.

Impact analysis

- Interface options:
 - Web UI
- Business segment impacts:
 - All business segments for both Owners and Partners

Search Shipment Notices by Date Filter and Transfer From Business

For Product Information Manager Owners and Partners, the [Search Shipment Notices by Access Code](#) screen has been updated in the following ways to improve usability:

- The **Date** drop-down is added to filter and view the list of shipment notices for the selected time period. Only shipment notices for the last 15 days are available. The system will return an error if the search exceeds 15 days. The filter options are:
 - **Last Week** (default)
 - **Custom Range** (maximum 15 days)
- The **Transfer From Business** field is changed from a type ahead to a text box. The values entered in the **Transfer From Business** field must exactly match the Transfer From Business value listed in the shipment notice, partial matches are not returned.

Impact analysis

- Interface options:
 - Web UI
- Business segment impacts:
 - All business segments for both Owners and Partners
