Release Summary

What's new in the APIs

Explore what's new in the Agile Process Teams, version 2025.1.0 release. To learn more about what's new in the Supply Chain Work Management, solution version 1.0.0 that provides the user interface for this app, see What's new in the user interface.

Release information

This document describes the TraceLink capabilities included in the Agile Process Teams, version 2025.1.0 app release, which is available on Validation on 10 Jan 2025 and Production on 23 Jan 2025.

The following apps are impacted by this release and will be updated to the version listed:

- Agile Process Teams, version 2025.1.0

  Solutions supported by this app version:

  - Supply Chain Work Management, solution version 1.0.0

The features below are in order of functional relevance (i.e. the typical order in which a user executes a function or task).

Revisions

Date	Revision	Description
10 Jan 2025	01	Initial version. • 0 issues are added to Resolved issues. • 1 issues is added to Known issues.

API features

The following new or updated API functionality is included in this release.

Item APIs

Companies that own or link to Process Orchestration for Empowered Teams can use Item APIs for situations where two companies collaborate on a shared task without a specific due date or deadline, such as tracking the supply of Active Pharmaceutical Ingredients (APIs) by an API manufacturer. Item APIs provide the same functions that can be performed in Process Orchestration for Empowered Teams UI. The following APIs are available for Items:

- **Add Item**: Owners and Partners of Process Orchestration for Empowered Teams can use the Add Item API to create a new item.
- **Edit Item**: Owners and Partners of Process Orchestration for Empowered Teams can use the Edit Item API to edit or modify an existing item.
- **Search Item**: Owners and Partners of Process Orchestration for Empowered Teams can use the Search Item API to search for an existing item.
- **Delete Item**: Owners and Partners of Process Orchestration for Empowered Teams can use the Delete Item API to delete an existing item.
- **Follow Item**: Owners and Partners of Process Orchestration for Empowered Teams can use the Follow Item API to start following an item.
- **Unfollow Item**: Owners and Partners of Process Orchestration for Empowered Teams can use the Unfollow Item API to stop following an item.
- **View Item**: Owners and Partners of Process Orchestration for Empowered Teams can use the View Item API to view an item.

Impact analysis

- Interface options:
    - API
- Business segment impacts:
    - All business segments for both Owners and Partners

Work Item APIs

Companies that own or link to Process Orchestration for Empowered Teams Companies can use work item APIs to complete a shared task within a strict deadline, such as manufacturing, quality control, packaging, and distribution of life-saving medication. Work Item APIs provide the same functions that can be performed in Process Orchestration for Empowered Teams UI. The following APIs are available for Work Items:

- **Add Work Item**: Owners and Partners of Process Orchestration for Empowered Teams can use the Add Work item API to create a new work item.
- **Edit Work Item**: Owners and Partners of Process Orchestration for Empowered Teams can use the Edit Work item API to edit or modify an existing work item.
- **Search Work Item**: Owners and Partners of Process Orchestration for Empowered Teams can use the Search Work item API to search for an existing work item.
- **Delete Work Item**: Owners and Partners of Process Orchestration for Empowered Teams can use the Delete Work item API to delete a work item.
- **Follow Work Item**: Owners and Partners of Process Orchestration for Empowered Teams can use the Follow Work item API to start following an work item.

- **Unfollow Work Item**: Owners and Partners of Process Orchestration for Empowered Teams can use the Unfollow Work item API to stop following an work item.
- **View Work Item**: Owners and Partners of Process Orchestration for Empowered Teams can use the View Work item API to view a work item.

Impact analysis

- Interface options:
  - API
- Business segment impacts:
  - All business segments for both Owners and Partners

System features

There is no new or updated system functionality included in this release.

Resolved issues

Agile Process Teams, version 2025.1.0

There are no resolved issues in this release.

Known issues

Agile Process Teams, version 2025.1.0

The following known issues are included in this release and will be fixed in a future patch release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

ID	Interface	Issue Description
TL-58607: Items or Work Items Cannot be Assigned to an Owner or Partner Company Location	API	The Owner company cannot assign a Item or Work Item to either their own internal location or to a Partner company's location. Item and Work Item can currently be assigned to the Partner Company headquarters as set up in the Master Data.
