## API features

The following new or updated API functionality is included in this release.

### Create Compliance Exceptions

Users of Agile Process Teams can now use the [compliance exceptions API](#), to create and manage compliance exceptions to collaborate with relevant upstream or downstream partners, and resolve issues quickly. Compliance exceptions allow Owners or Partners to collaborate with their internal locations and external Partners to record and report a variety of deviations for products throughout the supply chain. Compliance Exceptions are created as a sub-type of the Work Item base object, ensuring efficient tracking and resolution.

## Impact analysis

- Interface options:
  - API
- Business segment impacts:
  - All business segments for both Owners and Partners

## System features

### Assignee User Field for Work Items

This feature includes updates to TraceLink's internal APIs that are leveraged by the UI to deliver the [Assignee User Field for Work Items](#) feature in the Process Orchestration for Empowered Teams, solution version 2.0.0 release.
