Release Summary

What's new in the APIs

Explore what's new in the Agile Process Teams, version 2026.3.0 release. To learn more about what's new in the Process Orchestration for Empowered Teams, solution version 8.0.0 that provides the user interface for this app, see What's new in the user interface.

Release information

This document describes the TraceLink capabilities included in the Agile Process Teams, version 2026.3.0 app release, which is available on Validation on 03 Sep 2026 and Production on 01 Oct 2026.

The following apps are impacted by this release and will be updated to the version listed:

- Agile Process Teams, version 2026.3.0

  Solutions supported by this app version:

  - Process Orchestration for Empowered Teams, solution version 8.0.0

The features below are in order of functional relevance (i.e. the typical order in which a user executes a function or task).

⚠ This Help Center is subject to change based on the deployment of the release. In the event of changes, the Help Center will be updated within one week of release deployment. Deployment completion can be confirmed in the TraceLink Release Notice email.

Patch releases

The following patches are released for this version:

- Agile Process Teams, version 2026.3.1 is available on Validation on 22 Oct 2026 and Production on 05 Nov 2026.

These patches are cumulative, and the most recent patch release includes functionality from all previous versions.

Revisions

Date	Revision	Description
06 Aug 2026	01	Initial version.
03 Sep 2026	02	The following updates have been made since the previous revision was distributed: • 5 issues are added to Resolved issues. • 0 issues are added to Known issues

22 Oct 2026	03	The following updates have been made since the previous revision was distributed:
		• Issue information for the Agile Process Teams, version 2026.3.1 patch is added:
		  • 1 issue is added to Resolved issues.
		  • 0 issues are added to Known issues.

API features

There is no new or updated API functionality included in this release.

System features

The following new or updated system functionality will be included in this release.

Email Notifications for Failed SOM Transactions

This feature includes updates to TraceLink's internal APIs that are leveraged by the UI to deliver the Email Notifications for Failed SOM Transactions feature in the Process Orchestration for Empowered Teams, solution version 8.0.0 release.

Impact analysis

The impacts for this feature are the same as the Email Notifications for Failed SOM Transactions feature in the Process Orchestration for Empowered Teams, solution version 8.0.0 release.

Create Child Work Items from Lists

This feature includes updates to TraceLink's internal APIs that are leveraged by the UI to deliver the Create Child Work Items from Lists feature in the Process Orchestration for Empowered Teams, solution version 8.0.0 release.

Impact analysis

The impacts for this feature are the same as the Create Child Work Items from Lists feature in the Process Orchestration for Empowered Teams, solution version 8.0.0 release.

Update Item, Work Item, and List Details at Creation

This feature includes updates to TraceLink's internal APIs that are leveraged by the UI to deliver the Update Item, Work Item, and List Details at Creation feature in the Process Orchestration for Empowered Teams, solution version 8.0.0 release.

Impact analysis

The impacts for this feature are the same as the Update Item, Work Item, and List Details at Creation feature in the Process Orchestration for Empowered Teams, solution version 8.0.0 release.

Resolved issues

Agile Process Teams, version 2026.3.1

The following issues are resolved in this release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

ID	Interface	Issue Description
CMCP-44073: Network Configuration Processing Delays	API	Processing network configurations took longer than expected because unnecessary caching activity increased system load. This issue is resolved.

Agile Process Teams, version 2026.3.0

The following issues are resolved in this release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

ID	Interface	Issue Description
TL-89392: Inconsistent Timestamp Formats in Transaction Notifications and the UI	API	The lastModifiedTimeStamp used a 24-hour format in Message Hub and outbound transaction notifications but appeared in a 12-hour format in the UI. This issue is resolved.
TL-107482: Differences Between Message Hub and Outbound Work Item Notifications	API	Assigned Work Item notifications sent through Message Hub and outbound email differed in their Work Item details, email body content, helper-text behavior, and due-date formatting.

ID	Interface	Issue Description
		This issue is resolved.
TL-108872: Owner Incorrectly Receives Partner Notifications	API	When an Owner moved a Work Item from Draft to To Do state and selected a Partner company as the assignee, other Owners also received the outbound notification intended only for users in the assigned Partner company. This issue is resolved.
TL-111148: Timestamp Mismatch in Added Comments	API	When an Owner added a comment to an object, the commentedDateTime did not match the lastModifiedTimeStamp. The creationTimestamp, dateClosed, dateSubmitted, and commentedDateTime also did not consistently use the same timestamp format as the lastModifiedTimeStamp. This issue is resolved.
TL-114995: Email Comments Prevent Work Item Updates	API	Comments added to Work Items through email could retain unsupported Outlook formatting and hyperlink attributes, resulting in malformed comment content and a 403 error when the Work Item was later updated. This issue is resolved.

Known issues

Agile Process Teams, version 2026.3.1

There are no known issues in this release.

Agile Process Teams, version 2026.3.0

There are no known issues in this release.
