  Apps that support this solution version:

  - Serialized Operations Manager, version 2024.2

The features below are in order of functional relevance (i.e. the typical order in which a user executes a function or task).

Revisions

Date	Revision	Description
04 Jun 2024	01	Initial version.
07 Jun 2024	02	The following updates have been made since the previous revision was distributed: • The feature description is updated for Integrate Recall Information from Product Information Exchange.

Features

Integrate Recall Information from Product Information Exchange

Companies that own Serialized Operations Manager, Product Information Exchange, Agile Process Teams (for Recalls), and onboarded to SOM on Opus, can automatically receive recall information. When enabled, the impacted lot and the serial numbers associated with the product's NDC and lot number combinations are automatically marked as recalled in Serialized Operations Manager. If the updated recall information is received from Product Information Exchange after integration, Serialized Operations Manager automatically updates the impacted lot numbers. Previously, Serialized Operations Manager users had to manually mark the lot as recalled for the impacted NDC and lot number combinations.

For more information on how to enable this feature, see the *Company Administration Online Help*.

Impact analysis

- Interface options:
  - There are no UI or API impacts.
- Business segment impacts:
  - Pharmaceutical Manufacturers (both Owners and Partners)
  - CMOs and CPOs (both Owners and Partners)
