Resolved issues

Agile Process Teams, version 2026.2.1

The following issues are resolved in this release. The prefixes are for internal TraceLink tracking purposes and do not mean anything to customers.

ID	Interface	Issue Description
CMCP-43066: Email Replies Fail for Past-Due Exceptions	API	Email replies to exceptions could not be processed after the exception due date had passed because of a due date validation requirement. This validation has been removed, allowing users to continue adding comments to exceptions through email regardless of the due date. This issue is resolved.
CMCP-43097: Attachments Added Through Email Comments Cannot Be Downloaded	API	Attachments included in email replies were visible in compliance exception comments but could not be downloaded from the Compliance Exception View page. This issue occurred because the attachments were associated with the email transaction instead of the corresponding work item. This issue is resolved.
